

# GHS LABEL

## IMDG COMPLIANT!

Intermec's Duratran II 2 mil gloss white polyester with high performance adhesive has been tested and confirmed to meet BS5609 for marine submersion. On-demand print with TMX3202 ribbon and full color flexographic preprint have also been certified compliant, providing a turnkey solution for hazardous chemical labeling and freeing end users from the requirement to conduct resource-intensive print durability testing with outside labs.

## SATISFY NEW GHS REQUIREMENTS!

Using standard label format with red hazard diamond, print hazard pictograms, text, and graphics on demand to simplify consumables and ease compliance with the new mandate.

## ESTABLISH CHAIN OF CUSTODY!

Use Intermec printers to add bar codes on-demand, enabling supply chain traceability of chemical shipments.
